Create your own web application

Choose your Project topic, for which web application has to be designed. The same topic has to be used for all the lab activities.

Step-1: 20.7.2022

Use basic HTML tags to create few static web pages for the chosen topic. The first page should be the home page, where the basic information about the topic should be described.

The following tags should be used in this page.

html, head, title, body, h1, p, a, img, table, tr, th, td, br

Consolidate today's lab session work with date, description, code (as it is from Notepad/Code Editor) and output screenshot(s). Make sure to write your RegNo and Name in Comments in each code as well as Viewable in the output Screenshot for each page. Submit only PDF for Lab Assignment 1 in Teams before end of lab session.

Project Topic: Computer Accessories

CODE:

```
<!DOCTYPE HTML>
<html>
<!-- PRIYANSHU VYAS - 20BCE1685 -->
<head>
<title>Home-Page</title>
</head>
<body>
<h1> Computer Accessories </h1>
<br>
<p> Any device added to a computer that performs an additional capability or feature, but is not required. <br> A good example of an accessory is the computer printer, which gives the
```

computer the ability to print.
However, a computer would still work if it didn't have the printer. </p>
